

To proceed to the next step of your application, we need you to do a quick quiz that will give you a link to the Calendly of Kenley, the Director of Data Science.

First, you would need to take a look at the [California Traffic Collision Data](#) and answer the following questions on **collisions that took place in 2020**:

1. Which day of the week(e.g. Sunday, Monday) had the most number of collisions?
2. What county had the most number of injured victims?
3. What is the average age of a party at fault who is under the influence of drugs? Please **round down** your answer(e.g. 55.96 becomes 55)

The answers to the following questions will be combined together into a URL path for a bit.ly link joined by dashes. All letters will be lowercase and numbers with decimals will be rounded down to the nearest whole number. Answers with spaces will also have the spaces replaced with dashes.

For example, if our test had the following questions:

1. What is the capital of the Philippines? (Answer is Manila)
2. What is the largest ocean in the world? (Answer is Pacific Ocean)
3. What is the value of e or Euler's number? Please round down your answer. (Answer is 2.71828, but will only be 2 when included in the url)

You will get the following URL as the final answer:

<https://bit.ly/manila-pacific-ocean-2>

Clicking the link above will redirect you to the Plentina home page.

After obtaining the right answer and combining them into a bit.ly URL, the right link will redirect you to a Calendly link that will allow you to schedule your next interview.

We wish you the best of luck!
